# THE ROAD AHEAD

- Problems Abound
- Online Fraud
- Business Fraud
- Political Fraud
- Financial Inclusion
- Cross-Border Payments
- Financial Resilience
- Opportunities Abound

# Problems Abound

Bitcoin and its underlying block chain technology can be leveraged in many ways to offer new solutions to many real world problems.

- There is no shortage of problems
- No pain, no gain?
- What would you do if you could leverage an immutable / decentralized / open data ledger?

# Online Fraud

Block Chain technology delivers the means to create a safer e-commerce environment.

- Addressing ID Theft
- Addressing charge-back fraud
- Enabling trust-less payments

# Business Fraud

Block Chain Technology offers tools to work towards a more honest business environment.

- Addressing accounting fraud
- Addressing abuses of signatory power
- Addressing market rigging fraud

# Political Fraud

Block Chain technology offers ways to enable a more transparent and democratic world.

- Addressing electoral fraud
- Addressing corruption
- Enabling civic engagement & participation

# Financial Inclusion

Bitcoin empowers anyone with a mobile phone to become financially included.

- Lowering barriers for the un(der)-banked
- Enabling peer-to-peer lending & micro-finance
- Enabling peer-to-peer crowd-funding

# Cross-Border Payments

Bitcoin delivers faster and more affordable cross-border payment channels.

- Remittances
- International Payrolls
- International Trade Settlements

# Financial Resilience

Block Chain Technology offers an opportunity to build a more resilient financial system.

- Addressing the TBTF dilemma
- Enabling resilience through diversity

# Opportunities Abound

- In 5 years, Bitcoin has grown into the most powerful computing network in the world.
- The Block Chain is the world's first immutable, decentralized open data ledger.
- Leveraging Block Chain Tech can offer many opportunities to entrepreneurs looking to address some of the many real world problems.
